EXTERNALITIES

“An external cost is a cost not included in the market price of the goods and services being produced, i.e. **a cost not borne by those who create it.**”

CAPITAL + LABOUR = MORE CAPITAL
(adding value by creating products and services)

CAPITAL + LABOUR = MORE CAPITAL
(adding value by creating products and services)

$$\text{CAPITAL} + \text{LABOUR} = \text{MORE CAPITAL}$$

The diagram illustrates a cyclical relationship between capital and labour. It features the equation $\text{CAPITAL} + \text{LABOUR} = \text{MORE CAPITAL}$. A plus sign is positioned between 'CAPITAL' and 'LABOUR', and an equals sign is between the sum and 'MORE CAPITAL'. A large 'X' is placed above the equals sign. A horizontal line connects the plus sign and the 'X', with a downward-pointing arrow leading to the word 'LABOUR'. Another horizontal line connects the 'X' and the equals sign, with a downward-pointing arrow leading to the equals sign.

income support,
food banks,
etc

An upward-pointing arrow originates from the text 'income support, food banks, etc' and points directly to the word 'LABOUR' in the equation above.

I'm a Slave 4 U

I know I may come off quiet

May come off shy

But I feel like talking, feel like dancing

When I see this guy

LEADERSHIP STRATEGY

The Clear Connection Between Slavery And American Capitalism

HBS Working Knowledge Contributor ©

Business research for business leaders

May 3, 2017, 12:47pm EDT

f By Dina Gerdeman

🐦 The ties between slavery and capitalism in the United States weren't always crystal clear in our history books. For a long time, historians mostly depicted slavery as a regional institution of cruelty in the South, and certainly not the driver of broad American economic prosperity.

Art & Lifestyle - Not for everyone

The red icon on your iPhone or iPod touch always reminds you (and others when you show it to them) that you were able to afford this.

It's a work of art with no hidden function at all.

After pressing the (i) on the main page, a secret mantra will be shown. This may help you to stay rich, healthy and successful.

If it's too expensive for you - check out my other apps - they are all much cheaper.

Banner Ads Have 99 Problems And A Click Ain't One

by Daniel Brenner on May 21, 2020 in Content Marketing

the Correspondent

Analysis

6 November 2019 • Reading time 21 - 26 minutes

In 2018 \$273bn was spent on digital ads globally. We delve into the world of clicks, banners and keywords to find out if any of it is real. What do we really know about the effectiveness of digital advertising?

The new dot com bubble is here: it's called online advertising

Banner Ads Have 99 Problems But A Click Ain't One

“Brands pay [a] premium for the promise of automated microtargeting, but a study by Nico Neumann, Catherine E. Tucker, and Timothy Whitfield found that the accuracy of that targeting is often extremely poor. In one experiment, they used six different advertising platforms in an effort to reach Australian men between the ages of 25 and 44. **Their targeting performed slightly worse than random guessing.**”
